

Andras Pirisi

Hungary

I have recently finished my combined CPL / ME-IR training at Ventum Air in Warsaw. Before I decided on Ventum, I did really deep research in several countries, visited many schools.

I must say that I really got what I paid for and even more, as instructors were professional – many of them with airline background -,excellent knowledge and attitude. I flew on new glass cockpit aircrafts like PS-28 Cruisers and Tecnam P2006T twin engine, great experience – also Warsaw Babice airport is an ideal place for every level of trainings.

Truly positive experience and recommended, all the best to Ventum Team!

Dziekuje bardzo,

András Pirisi
